*ANALOG PHOTOELECTRIC  
SMOKE DETECTOR*

## GENERAL DESCRIPTION

The System Sensor Filtrex Smoke Detector provides early warning smoke detection in difficult environments where traditional smoke detectors are not practical. Filtrex provides protection in dirty, dusty environments that tend to cause false alarms with standard smoke detectors.

### Operation

Using a small air intake fan and a high density replaceable filter, air and smoke are drawn into a photoelectric sensing chamber while air-borne particulate and water spray are removed. When the filter becomes too clogged to draw adequate air into the sensing chamber, power is cut from the detector, causing a missing device signal at the fire alarm control panel. When the filter is replaced, power-up is automatic.

### Applications

Animal research facilities  
Institutional laundry facilities  
Amusement parks  
Zoos  
Performance theatres  
Loading docks  
Paper mills  
Textile mills
